Zain Bahalim

US Citizen, Houston, TX

346-561-3033 | zainbahalim@gmail.com | linkedin.com/in/zainbahalim | github.com/zainbahalim | zainbahalim.dev

Education

Lone Star College **Aug. 2025 – May 2027**
Associate of Science in Computer Science *Tomball, TX*

Experience

Nagarro **Jun. 2026 – Present**
Cloud Network Engineer (Contract) *New York, NY*

- Delivered high-level customer service and production support, maintaining **99.9% uptime** for 200+ users by determining root causes of complex system, VPN, and connectivity issues
- Managed IT workflows and support tickets using **ServiceNow and Jira**, successfully responding to incidents requiring in-depth troubleshooting of production environments
- Adhered to strict change-management disciplines, standardizing environment promotion, secure de-provisioning procedures, and release notes to reduce IT resolution time by **20%**

Hermes Cloud Technology Partners **Jan. 2026 – Apr. 2026**
AI Developer Intern *Tomball, TX*

- Developed full-stack infrastructure automation and automated testing scripts utilizing Python, driving continuous integration across **Git-based CI/CD pipelines (Azure DevOps / GitHub Actions)**
- Leveraged **AI coding assistants** in daily software development, applying technical judgment to review, thoroughly test, and correct AI-generated code prior to deployment
- Interfaced with internal IT teams and business stakeholders to design and implement interactive dashboards that monitored production system performance and logging events in real-time

GoExpedi **Aug. 2025 – Nov. 2025**
Cloud/DevOps Intern *Houston, TX*

- Supported platform migrations and major cloud infrastructure upgrades across **3 Azure environments**, enforcing least privilege principles and Role-Based Access Control (RBAC)
- Wrote and tuned complex **SQL and KQL queries** against production data sources to triage 15+ critical security alerts, significantly reducing incident response times
- Collaborated with 3rd party vendors and cross-functional teams to resolve infrastructure anomalies and accelerate secure server deployment times by **35%**

Projects

Enterprise IAM & Cloud Storage System | *Python, SQL, RBAC, REST APIs* **Dec. 2025**

- Demonstrated **full-stack ownership** of a scalable web application spanning a relational database, back-end API, and front-end interface deployed across 3 permission tiers
- Wrote, tuned, and executed complex **SQL queries and stored procedures** (including joins and data modeling) to ensure highly available, fast data retrieval for secure document storage
- Designed and consumed **REST APIs** for system-to-system integrations, implementing stringent authentication protocols, payload validation, and AES-256 encryption

Automated Security Event & Log Analyzer | *Python, OpenAI API, LLMs* **Jun. 2026**

- Applied **Enterprise AI concepts** (hosted model APIs, prompt engineering) to automate log analysis and incident triage by integrating the Azure OpenAI REST API
- Handled error/retry handling and minimized **LLM hallucination risk** by closely managing tokens and context limits when evaluating complex error codes and system events

Cloud SIEM & Network Security Lab | *Virtual Machines, Log Analytics, KQL* **Mar. 2026**

- Enhanced monitoring capabilities by working with various technical teams to capture and analyze network anomalies, validating defense-in-depth protocols across 10 servers

Technical Skills

Languages: Python, C# (Familiar), Java, C++, SQL, JavaScript, HTML/CSS, PowerShell, Bash, KQL
Database & Backend: SQL (Queries, Stored Procedures, Tuning, Joins), Relational Data Modeling, REST APIs, JSON Payload Validation, System-to-System Integrations
DevOps & Tools: Git, Azure DevOps, GitHub Actions, CI/CD, Jira, ServiceNow, Microsoft Azure
Enterprise AI: LLMs, Prompt Engineering, Hosted Model APIs, AI Coding Assistants, Context Limits
Methodologies: Full-Stack Development, Change Management, Agile, Incident Response, UAT
Spoken Languages: Urdu (Fluent), Spanish (Conversational), Hindi (Fluent)

Certifications

Completed: Microsoft AZ-900 (Azure Fundamentals)
In Progress: CompTIA Security+, Cisco CCNA, Microsoft AZ-104 (Azure Administrator)
