Education

Lone Star College

Aug. 2025 – May 2027

Associate of Science in Computer Science

Tomball, TX

- Relevant Coursework: Programming Fundamentals, Object-Oriented Programming, Data Structures & Algorithms, Cloud Computing, Linux/Systems Administration, Networking & Computer Systems, Database Systems

Experience

Hermes Cloud Technology Partners

Jan. 2026 – April 2026

AI Engineering Intern

Tomball, Texas

- Automated testing via Azure Test Plans, reducing bug identification time by **30%** across 3 environments and 150+ test cases
- Engineered CI/CD pipelines in Azure DevOps using Python/PowerShell, cutting regression cycle time by **40%** for 5 teams
- Developed a reporting dashboard using Vanilla JS/Chart.js, saving **6 hours/week** in manual reporting for 12+ stakeholders

GoExpedi

Aug. 2025 – Nov. 2025

Cloud/DevOps Intern

Houston, Texas

- Reduced deployment time by **35%** by building CI/CD pipelines in Azure using Python and PowerShell across multiple environments
- Improved system reliability across 3 environments by configuring Azure App Services and Blob Storage with RBAC policies
- Decreased incident response time by **25%** by implementing monitoring dashboards using Azure Monitor and Log Analytics
- Detected and analyzed 15+ security events by writing KQL queries within a SIEM environment

Projects

Cloud File Storage Web App (Azure) | Python, Azure App Service, Azure Blob Storage

Dec. 2025

- Designed and implemented a cloud-based file storage system using Azure Blob Storage with role-based access control across 3 user tiers
- Implemented AES-256 encryption and RBAC authorization logic within a Python web application to enforce access boundaries
- Deployed and hosted the application on Azure App Service, configuring runtime environment and scaling settings

AI Resume Analyzer (Azure OpenAI) | Python, Azure OpenAI, REST APIs, HTML, JavaScript

Feb. 2026

- Integrated Azure OpenAI REST APIs into a Python backend to parse and analyze resume content, returning structured skill-based feedback in under 3 seconds per request
- Built a full-stack web application with an HTML/JavaScript frontend and Python backend, reducing manual resume review time by **75%** through instant AI-generated skill analysis and career recommendations
- Deployed and tested the application across 3+ resume formats, validating accurate parsing and consistent feedback generation across varied input structures

Azure SIEM Security Monitoring Lab | Azure Monitor, Log Analytics, KQL, Virtual Machines

Mar. 2026

- Engineered a cloud-based SIEM environment using Azure Monitor and Log Analytics Workspace across 10 virtual machines
- Simulated 15+ attack scenarios including brute-force and failed authentication events to populate security logs
- Wrote KQL queries to surface suspicious activity patterns and correlate events across monitored endpoints

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL, C++

Spoken Languages: Urdu (Fluent), Spanish (Conversational), Hindi (Fluent)

Frameworks & Libraries: Flask, REST APIs, Azure SDK, OpenAI API, KQL, Chart.JS

Developer Tools: Microsoft Azure, Azure Portal, VS Code, Eclipse, Google Cloud Platform, Linux

Concepts: CI/CD, DevOps, SIEM, RBAC, AES-256 Encryption, Agile, Cloud Infrastructure

Certifications

CompTIA Security+ (In Progress)

Microsoft AZ-900: Azure Fundamentals

Leadership & Extracurricular

Google Developer Program

March 2026 – Present

Developer

- Completed 10+ hands-on cloud infrastructure labs through Google Cloud Skills platform, gaining practical experience in Compute Engine, Cloud IAM, and VPC networking
- Building multi-cloud proficiency across 2 platforms (Microsoft Azure and GCP), applying concepts in networking, identity management, and cloud architecture
- Leveraging NVIDIA developer resources to explore AI/ML integrated cloud workflows and GPU-accelerated computing across 3+ learning modules

National Society of Leadership and Success (NSLS)

December 2025 – Present

Inducted Member

LSC University Park

- Selected among top students at LSC University Park for induction into a nationally recognized leadership honor society with a competitive acceptance process
- Completed structured leadership training covering professional communication, goal-setting, and accountability frameworks alongside 50+ peers
